MSNR

Key Levels

with Examples

@FXUPDATESLIVE

The Foundation of Smart Price Action -----

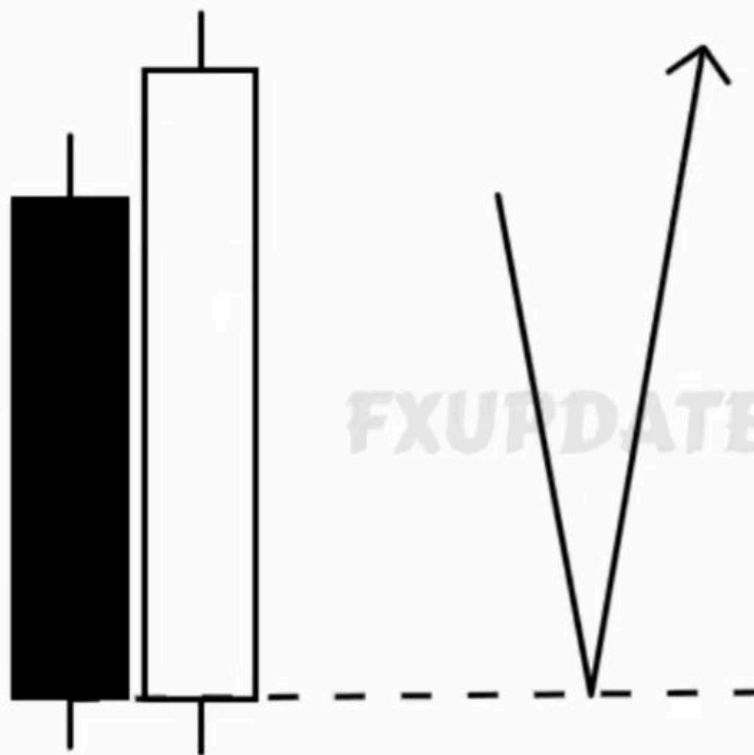

In MSNR, Key Levels are the most important zones where price reacts, reverses, rejects, or continues with momentum.

- **Support (V Shape)**
- **Resistance (A Shape)**
- **SBR (Support Become Resistance)**
- **RBS (Resistance Become Support)**
- **OCL (Open Close Level)**
- **QML (Quasimodo Level)**

MSNR is not about guessing the market – it's about reacting to the right levels with confirmation.
